Acknowledgment: We appreciate the comments received from Ann Vanstraelen and Martine Cools (University of Antwerp) and Patricia Everaert (Ghent University). We further appreciate the enthusiastic cooperation of the internal auditors in our case studies. We also want to thank Inne Remeysen (Ghent University) for her useful comments and for being our second independent person to code the interview transcriptions. A first draft of this paper was presented at the EIASM Workshop on Audit (Copenhagen – September 2004). We want to thank the participants for their useful comments and suggestions.

The interview guide and the coding list are available upon request.
