WORKING PAPER

**Examining Ricardian Equivalence by estimating and
bootstrapping a nonlinear dynamic panel model**

Griet Malengier¹

Lorenzo Pozzi²

November 2004

2004/274

Published as "Certainty Equivalence and the Excess Money, Credit and Sensitivity of Private Consumption" in Journal of Money, Credit and Banking, 2001, 33(1), 183-97848.

* Thanks to Freddy Heylen for useful comments and suggestions. Thanks to Gerdie Everaert for useful comments and suggestions and for letting us use his HP Proliant ML370 server. This allowed us to save time on the two-level bootstrap simulations. We wish to acknowledge support from the Interuniversity Attraction Poles Program - Belgian Science Policy, contract no. P5/21.
